

## Dalia

### TRACK SPOTLIGHTS | DALI SERIES

Spotlight with one LED spotlight units, "mini" construction size. Dalia is equipped with a lens system for high quality accent lighting in museums and exhibition spaces.

The low voltage adapter contains the electronics that converts constant voltage (48 V) to constant current for the luminaire. It rotates through 360°, pivots through 90°. Easy to mount without tools to the low voltage track.

Dalia has several series, determined by various add-on and controls:

- Dalia Non-DALI: the standard for any project in the retail sector
- **Dalia DALI: with DALI controls for illumination adjustment**

LIGHT DISTRIBUTION

**RISK GROUP**

---

**RG1**

The evaluation of photobiological safety is carried out according to the standard IEC 62471:2008 ("Photobiological safety of lamps and lamp systems"). Following the definition of the risk grouping system of the mentioned IEC standard, the LEDs mounted on this family fall into the class "Low Risk (RG1 – No photobiological hazard under normal behavioral limitations)". Under real circumstances (regarding exposure time, pupils, observation distance), it is assumed that there is no endangerment to the eye from these devices. As a matter of principle, however, it should be mentioned that intense light sources have a high secondary exposure potential due to their blinding effect.
